Real-time broadcast info overlay available

Connection

Presetting

1. Connection to the Internet.

Please refer to the GY-HM250 instruction manual and confirm you have a white network symbol in the view finder top right corner.

White Network Symbol

2. Recording setting

Please change the setting as follows. Resolution:

1920x1080 or 1280x720

Frame rate: 60p/50p/30p/25p

3. Streaming setting:

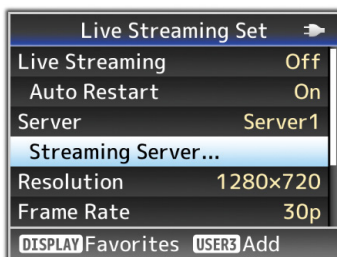

Resolution: 1280x720 or 640x360

Frame rate: 30p/25p

Bit rate: 3Mbps or below

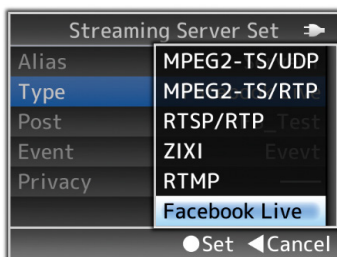

On camera

1. Select the server

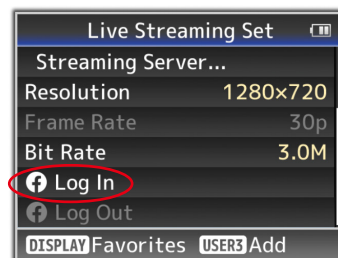

[Main Menu]
→ [System...]
→ [Network Settings...]
→ [Live Streaming Set...]
→ [Streaming Server...]
→ [Server 1]
(You can select from [Server 1] to [Server 4])

2. Select Facebook Live

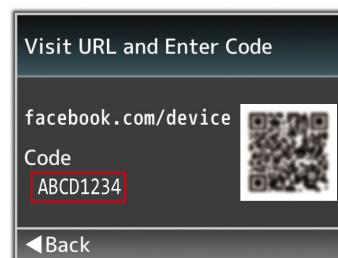

[Main Menu]
→ [System...]
→ [Network Settings...]
→ [Live Streaming Set...]
→ [Streaming Server...]
→ [Server 1]
→ [Type]
→ [Facebook Live]

3. Log in to Facebook

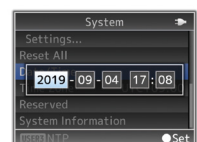

[Main Menu]
→ [System...]
→ [Network Settings...]
→ [Live Streaming Set...]
→ [f log in]

4. Register the camera

Following step 3, a code is displayed. Enter the code on facebook.com/device (You will need to be logged in to your account) and click "Continue".

If "Authorisation Failed" is displayed, check your Date Settings in the camera. The correct date setting is required for Facebook Live Log In.

On smartphone/tablet/PC

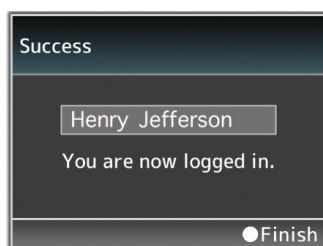

5. Complete the registration

Camera registration window will be displayed, then click "OK".

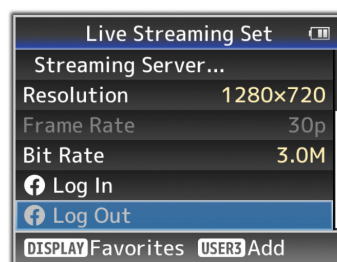

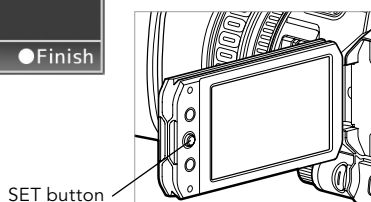

Registration completed.

On camera

6. Complete the setting

The screen shows "You are now logged in.", then press "SET" button on the GY-HM250.

You will remain logged in for 60 days. When you are logged out after 60 days, perform the log-in procedure again from step 3.

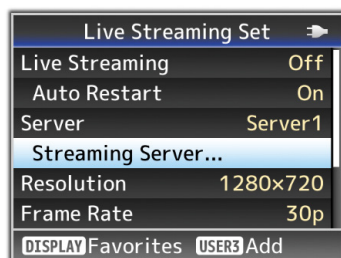

Action

Presetting

Log in the camera to Facebook. Refer to the "Connection" section.

On camera

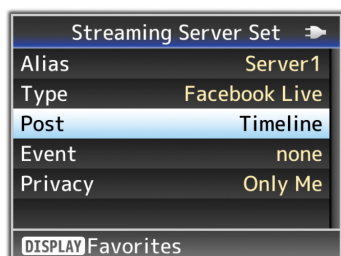

1. Select the server

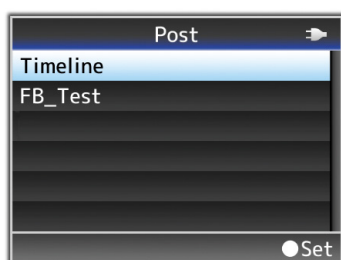

[Main Menu]
→ [System...]
→ [Network Settings...]
→ [Live Streaming Set...]
→ [Streaming Server...]
→ [Server 1]

You can select from [Server 1] to [Server 4].

2. Select Delivery Destination

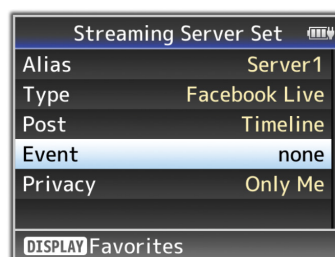

[System...]
→ [Network Settings...]
→ [Live Streaming Set...]
→ [Streaming Server...]
→ [Server 1]
→ [Post]

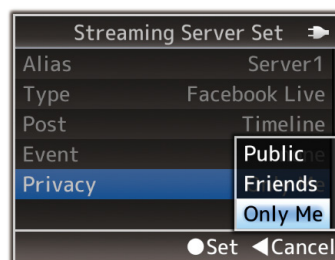

If the Timeline and Page exist, Page name is displayed.
If there are unsupported characters, those are shown as □ or =.

3. Event setting (Currently disabled)

Delivering to [Event] is currently disabled.

4. Privacy setting

When streaming to an event page set the privacy settings on your Facebook page. For any other Facebook Live streams set the privacy settings in the camera menu.

5. Start Facebook Live delivery

LIVE

[Main Menu]
→ [System...]
→ [Network Settings...]
→ [Live Streaming Set...]
→ [Live Streaming]
→ [On]

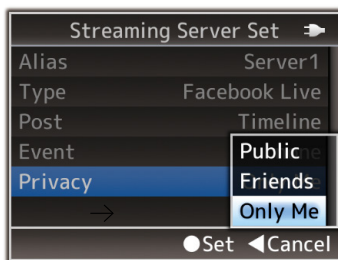

Alternatively configure one of the buttons on the side of the camera to start/stop the live stream. Please refer to the instruction manual for further details.

"LIVE" should now appear in the view finder to confirm the live stream.

How to set "Visibility of the app on Facebook"

Facebook setting should be done prior to the GY-HM250 setting. If you want to set to "Visibility of the app on Facebook" (Public, Friends, or Only Me), be sure to make the setting both on Facebook and the GY-HM250.

GY-HM250 Setting

When Facebook is set to Public, the GY-HM250 can be set to Public, Friends, or Only Me.

When Facebook is set to Friends, the GY-HM250 can be set to Friends or Only Me.

Facebook Setting

Main Menu

- Settings
- Business integrations
- Live from Cam...
- "Business integrations visibility and post audience"

Notes:

- Please read Facebook terms and conditions of use carefully before using.
- If you enable people to publish Live Video to Facebook, please do not include third party ads in your video content and to clearly distinguish any pre-recorded content from live content.
