

New JVC Gummy Mini True Wireless Earbuds Small Size, Big Value - HA-A5T-E

Gummymini
TRUE WIRELESS

JVC updates its immensely popular Gummy earbud series with the new Gummy Mini true wireless earbuds that deliver big value in a small compact new design.

The new JVC HA-A5T Gummy Mini earbuds' small size and light weight ensure a discreet and comfortable fit. Their affordable price brings true wireless convenience plus Gummy sound quality and comfort to a broader audience than ever before.

The Gummy Mini couldn't be easier to use, with single-button control, and auto on/off – the earbuds automatically power on and connect when removed from the case and power off when returned to the case. In addition, the option for single-ear use adds versatility. The earbuds offer 15 hours of battery life (includes charging via the case), while neodymium magnet drivers ensure the best possible sound quality. What's more, the earbuds are rain proof (IPX4), and include a hands-free voice assistant compatible microphone.

Available in three trendy colours: Olive Black, Matcha Green and Coconut White.
