auto

Smartphone ready!

Apple CarPlay Compatible

A smarter, safer and more fun way to use your iPhone in the car. CarPlay gives iPhone users an incredibly intuitive way to make calls, use Apple Maps, listen to music with just a word or a touch.

Some features, applications, and services are not available in all areas.

Note: Apple CarPlay is available with iPhone 5 and upwards with iOS7.1 or newer.

Android Auto™ Compatible

Android Auto was designed with safety in mind. With a simple and intuitive interface and powerful voice actions, it's designed to minimise distraction so that you can stay focused on the road.

Some features, applications, and services are not available in all areas.

Note: Android Auto is compatible with Android phones running Android 5.0 (Lollipop) or later.

Spotify Control (iPhone / Android)

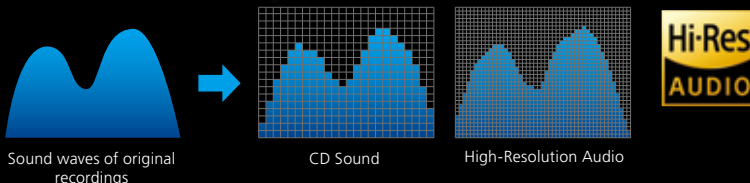

Listen to Spotify from your smartphone with smooth control on the head unit via USB or Bluetooth connection for iPhone, and via Bluetooth for Android devices.

Sound Optimisation

High-Resolution Audio Playback

You can enjoy playback of 96kHz/24bit audio which contains about 3 times the musical information of music CDs (44.1kHz/16bit), or even 192kHz/24bit High-Resolution Audio files with their approx. 6.5 times data volume.

Note: The product with High-Res Audio logo is conformed to High-Resolution Audio standard defined by Japan Audio Society. The logo is used under license from Japan Audio Society.

Time Alignment

By selecting the speaker type and the distance to the centre of the listening position, the head unit will automatically adjust the timing of the sound output from each of the speakers so that the sound from each of the speakers will arrive exactly at the same time to the listening position.

K2 Technology for Enhanced Digital Sound Quality

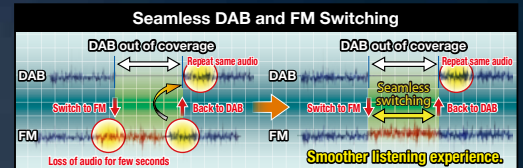

K2 Technology reproduces the original master sound by up-converting frequency range and bit rate. For example, K2 up-converts a CD data to 192kHz/32bit and recreates higher resolution sound.

Built-in DAB Tuner

DAB+ Tuner

A DAB tuner lets you enjoy digital radio broadcast from DAB and DAB+ stations. And in an area where DAB signals are weak, the DAB Tuner equipped in the receiver can seamlessly switch between DAB+ and FM without an audible interruption.

Stay connected on the road.

Bluetooth® Wireless Technology

JVC Streaming DJ

Connect up to 5 Bluetooth devices simultaneously, so you and your friends can take turns streaming music like a DJ. Cue up your hottest playlist and press play!

iPhone®/Android™ Automatic Pairing

Just connect your iPhone or Android device* via USB and the automatic Bluetooth pairing function will work to complete the pairing.

*JVC Music Play application is required.

2 Phones Full-Time Connection

You can connect two phones full time via Bluetooth, with secure and simple pairing.

Extra Convenience

JVC Remote Control App via Bluetooth

Control the receiver's source directly from the smartphone using simple finger gestures with "JVC Remote" app* now available for both iOS and Android. You can even customise your audio setting, and see detailed source information such as song title, artist name and album art etc. from the smartphone.

*For more information, visit www.jvc.net/car/app/jvc_remote/

Google Maps Guide And Real Time Traffic Updates

Google Maps guide you to your destination easily with free voice-guided navigation, live traffic information, lane guidance and more. The explore around you feature allows local search for food, drinks and much more.

Make And Receive Calls

Use voice activation to make calls, return missed calls or listen to voice mails.

Allows You To Send, Read And Reply To Messages

Use voice activation to send, read or reply to your messages.

Access Your Google Play Music Or Spotify App

Easily select your music library, Google Play Music subscription or simply ask what you would like to hear.

Waze

Waze is now adopted onto the Android Auto App platform. To provide the latest navigation guidance with live traffic updates.

Short Body

- Short Body 75mm
- Standard Body 153mm

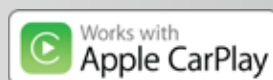

The reduced depth of the chassis contributes to a weight reduction and facilitates easier installation.

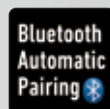

KW-M741BT

6.8" Capacitive Touch Control Monitor with Bluetooth

Apple CarPlay™ - with iPhone (5 or higher)

Apple Maps With Real Time Traffic Updates

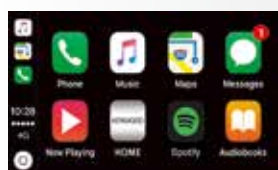

Use the power of Apple's predictive search and extensive destination database or from your email, texts, contacts and calendar information for simple and fast navigation. The near by feature allows local search for petrol stations, parking, restaurants and much more.

Make And Receive Calls

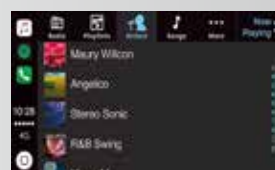

Ask Siri to make calls, return missed calls or listen to voice mails.

Allows You To Send, Read And Reply To Messages

Stay legal and rest your text fingers by using Siri to send, read or reply to your messages.

Access Your Music Content Using iTunes, Apple Music, Podcasts, Audiobooks And Apps Like Spotify

Easily select your iTunes music, Apple music membership, Podcasts, Audiobooks or simply ask Siri what you would like to listen to.

KD-DB98BT

DAB+ / Receiver with Bluetooth, iPhone-iPod, Android, USB/AUX, CD

KD-DB67

DAB+ Receiver with iPhone-Pod, Android, USB/AUX, CD

Built-in DAB Tuner

DAB (Digital Audio Broadcasting) delivers crystal clear audio from your favourite FM stations as well as a broad range of digital-only stations ranging from news and talk, to classical and rock. Enjoy both better quality and richer content with DAB.

Spotify Control (iPhone / Android)

Listen to Spotify from your smartphone with smooth control on the head unit via USB or Bluetooth connection for iPhone, and via Bluetooth for Android devices.

Android™ Music Playback and Charging via USB

Simply connect your Android smartphone or tablet to the receiver via the USB. Then enjoy a complete "plug and play" music playback solution. It will even charge your device whilst on the move.

JVC Remote Control App via Bluetooth

Control the receiver's source directly from the smartphone using simple finger gestures with "JVC Remote" app* now available for both iOS and Android. You can even customise your audio setting, and see detailed source information such as song title, artist name and album art etc. from the smartphone.

Sense Every Sound, Feel Every Beat

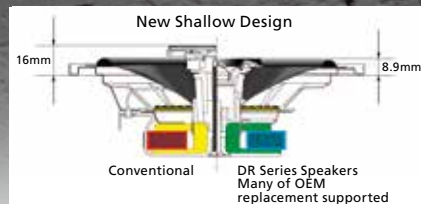

DR Series Speakers

Carbon Mica Cone

Robust and lightweight carbon mica material provides highly responsive, clear and undistorted reproduction.

Balanced Neodymium Tweeter

Provides detailed high range and smooth mid range. Installable vehicle types are greatly increased thanks to its shorter height.

Wide Opening Grill

Grill's opening ratio is 30% wider than the conventional model, enabling increased durability and clear sound.

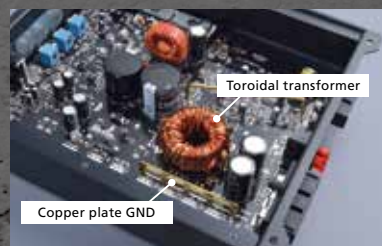

Hybrid Surround

Rubber Coated Cloth with increased mobility enables high efficiency and improved follow-up to audio signals.

Small-Design Tweeter Cover

Newly developed small cover significantly reduces areas that interfere with the woofer cone. High-quality sound is assured.

DR Series Amplifiers

• Toroidal Transformer

Stable power supply is assured thanks to a large-size toroidal transformer. Its high winding density and low flux leakage improves conversion efficiency of the power. The result is natural and powerful music playback throughout the volume range.

• Enhanced GND

KS-DR3001D offers a copper plate for the ground. Its low resistance value reduces loss of voltage to deliver clear sound with less distortion.

• Speaker-level Inputs for Easy Installation

DR Series amplifiers feature speaker level inputs with Auto Turn-on function. Installation is possible without having to detach the head unit.
